Citizenship

Noun

1. The status of a citizen with benefits and responsibilities
2. Conduct as a citizen; “award for good citizenship”

Citizenship

Noun

1. The status of a citizen with benefits and responsibilities
2. Conduct as a citizen; “award for good citizenship”

Citizenship

Noun

1. The status of a citizen with benefits and responsibilities
2. Conduct as a citizen; “award for good citizenship”

Your Benefits . . .

- Reduced support costs
- Positive product reviews
- Competitive advantage
- Simplified documentation
- Positive branding
- Satisfied customers
- Upgrade revenue

Citizenship

Noun

1. The status of a citizen with benefits and responsibilities
2. Conduct as a citizen; “award for good citizenship”

Your Responsibilities

- The basics
- Behaviors
- Appearance

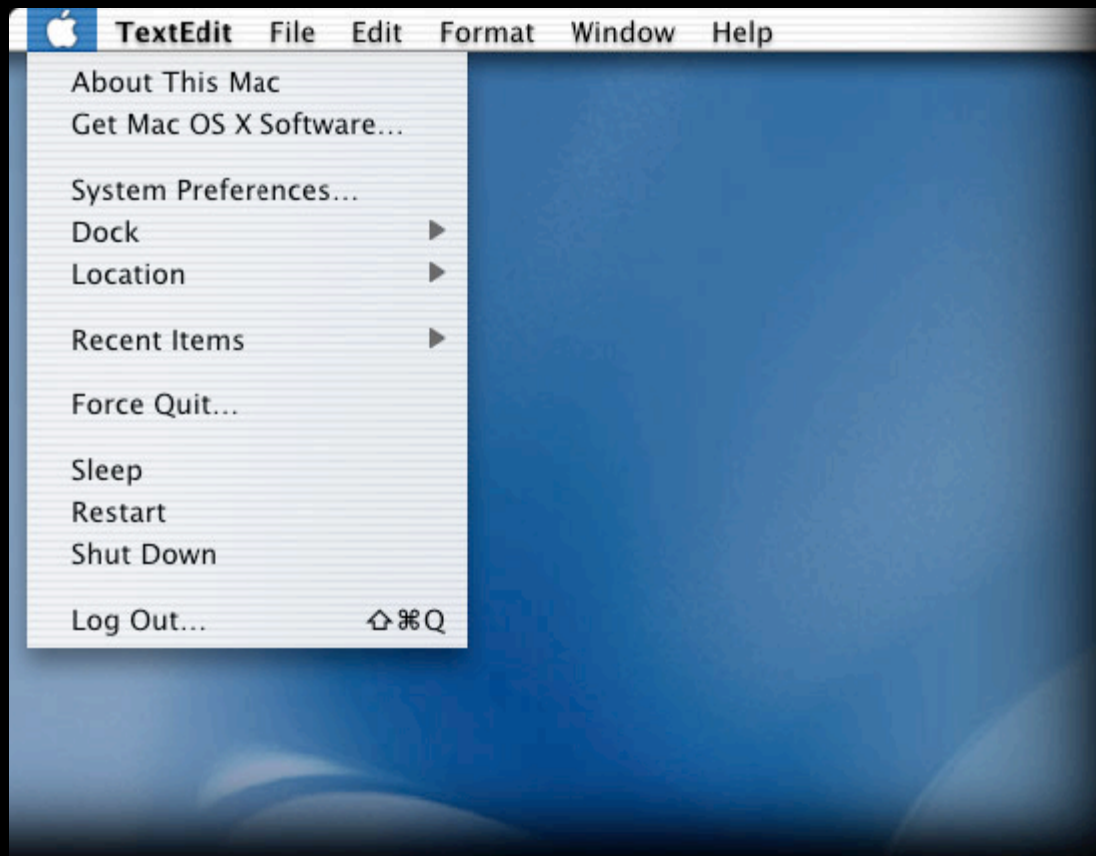

Your Responsibilities

Windows

eZediaMX

The image shows a screenshot of the eZediaMX application window. The window title bar reads "eZediaMX". Below the title bar is a toolbar containing various icons for editing and navigation. The main workspace contains three overlapping document windows, each titled "Untitled", "Untitled 2", and "Untitled 3" from top to bottom. The "Untitled 3" window is the most prominent and is currently empty. The window has standard Mac OS X window controls (red, yellow, green buttons) and a scroll bar on the right side.

Controls

Carbon Combo Box

- Carbon

 - `<HView.h>`

 - `HIComboBox...Create()`

- Cocoa

 - `NSComboBox`

Standard Alerts

Your iDisk cannot be accessed because you do not have an iTools member name and password in System Preferences.

You can enter your iTools information or sign up for an account on the iTools tab in the Internet pane of System Preferences.

Cancel

Open Internet Preferences...

Installing this software will cause the destination disk "Mac OS X" to be completely erased. Are you sure you want to install on this disk?

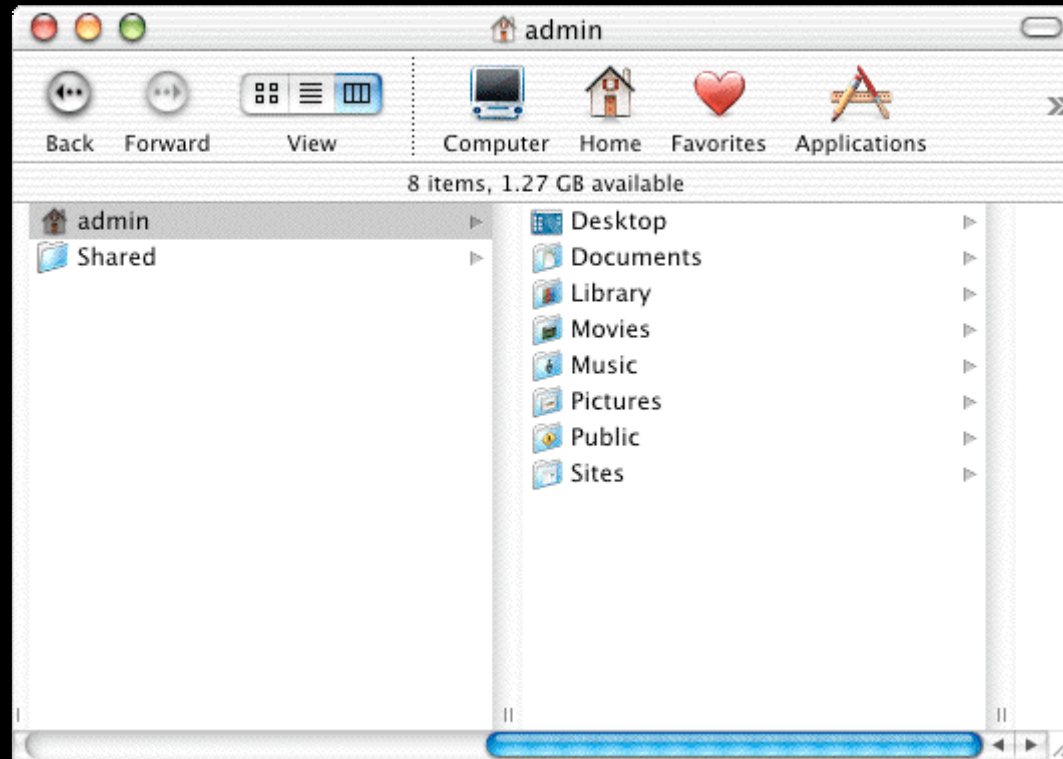

If you complete your installation, all the data on this disk will be lost.

Change Disk...

Continue Installation

Honor Default Folders

Avoid the Documents Folder

- It's only for user-created documents
- Use Library folder for application-support files
- Train users to back up their home folder

Your Responsibilities

- The basics
- Behaviors
- Appearance

Work With the Dock

- *All* applications should
 - Handle Dock clicks properly
 - Respect the Dock's location
- *Some* applications should
 - Provide status information via the Dock

Handle Dock Clicks Properly

- Always produce a window
- Document-based applications:
 - Open an untitled document window or activate the last minimized window
- Non-document-based applications:
 - Show the main application window
- Carbon: **ReopenApplication** AppleEvent
- Cocoa: Handled automatically

Respect the Dock's Location

Respect the Dock's Location

- Only for new and resized windows
- Users can change the Dock's location
- Carbon

GetAvailableWindowPositioningBounds()

- Cocoa

[NSScreen visibleFrame]

Status Info Via the Dock

Status Info Via the Dock

Status Info Via the Dock

- Carbon

 - MacWindows.h**

 - Application.h**

 - ...DockTile...()**

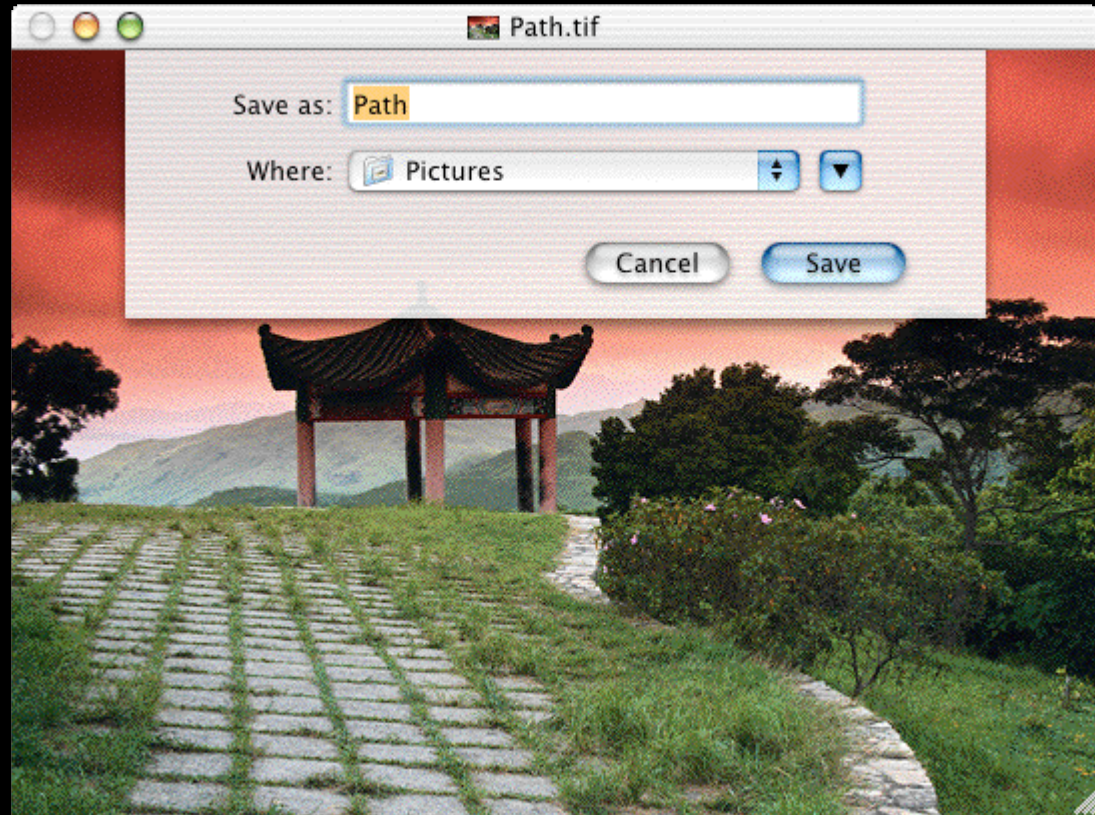

- Cocoa

 - [NSApplication setApplicationIcon:]**

Sheets

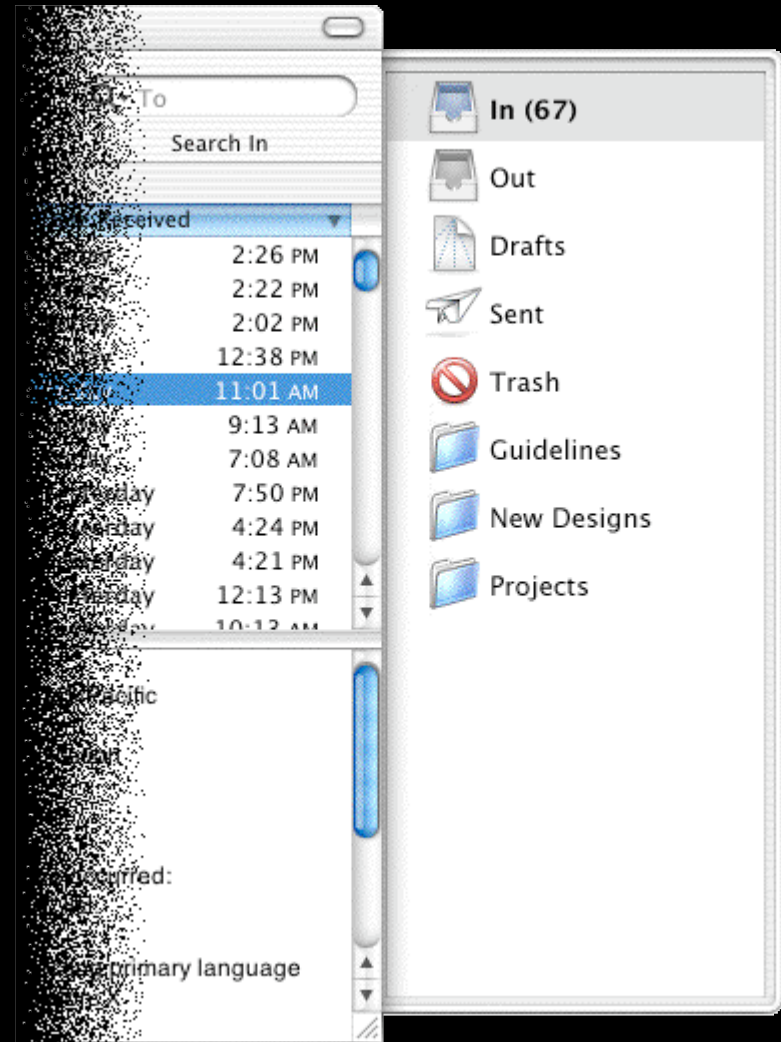

- For a dialog that applies to a single window or document

Drawers

Drawers provide:

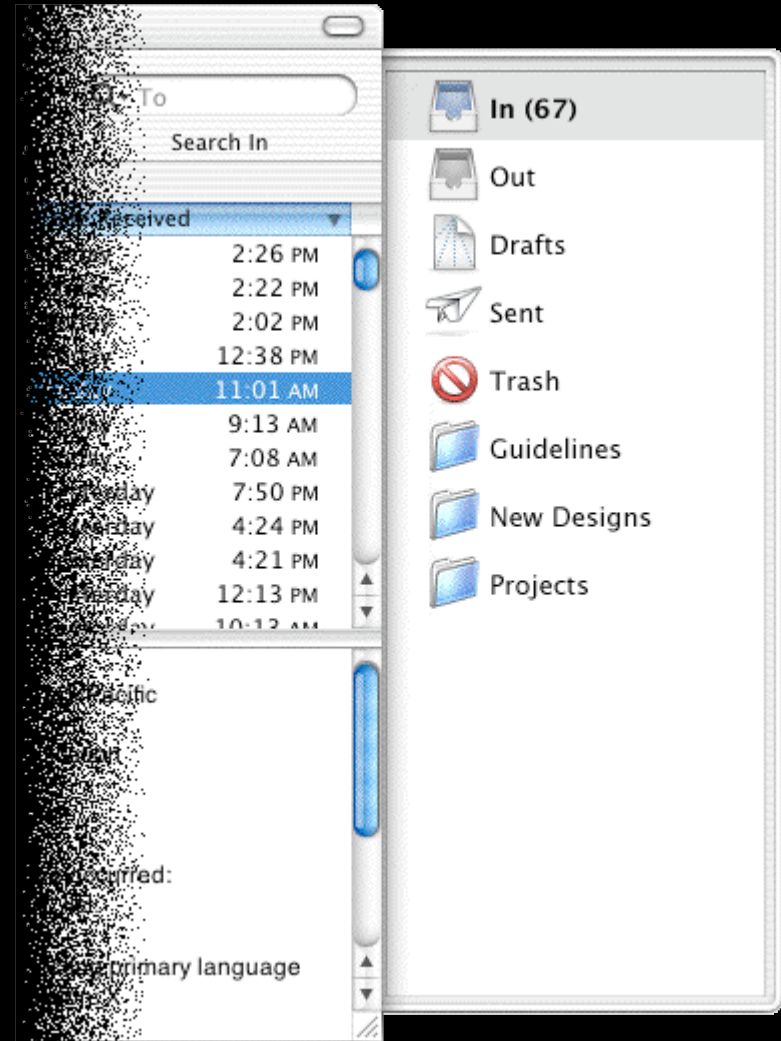

- Often-used controls that do not need to be visible all the time
- Additional functionality closely related to the parent window

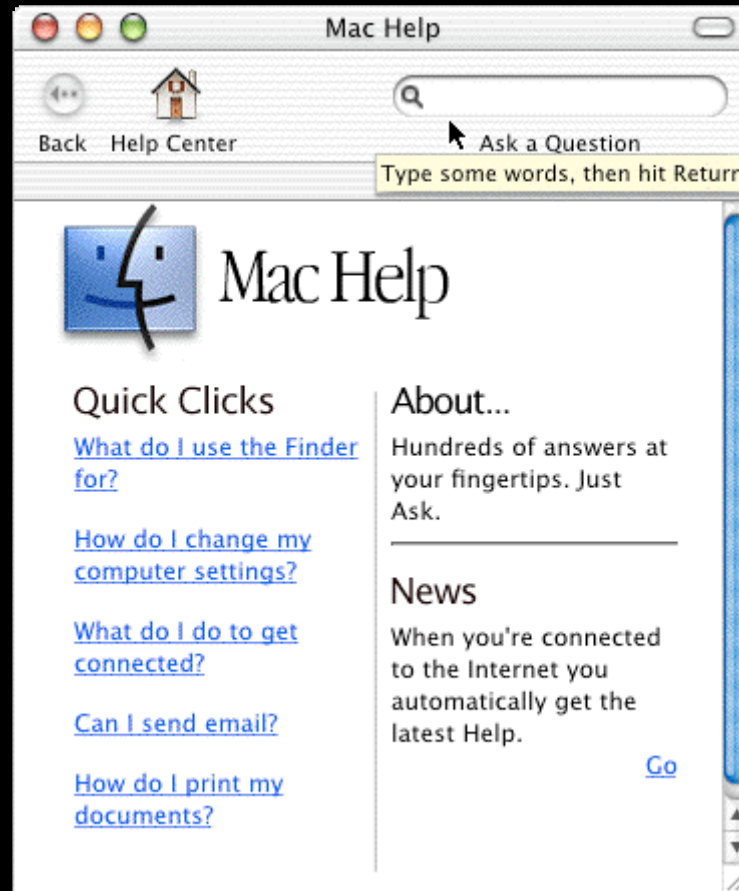

NEW

Now Available in Carbon!

- Carbon
 - New window type
<MacWindows.h>
...Drawers...
- Cocoa
NSDrawer

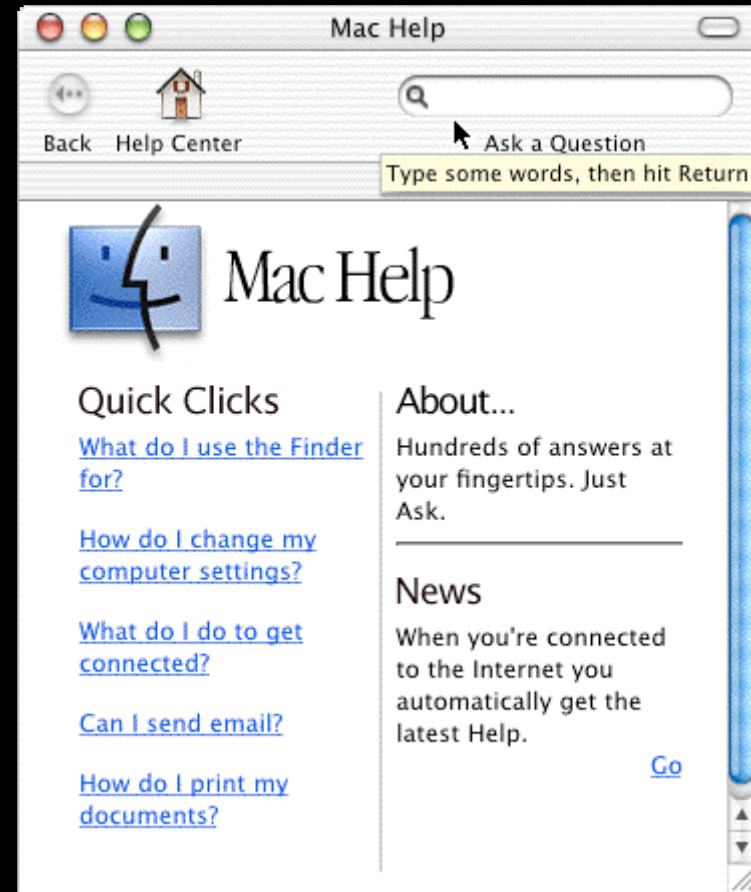

Apple Help

NEW

New in Apple Help

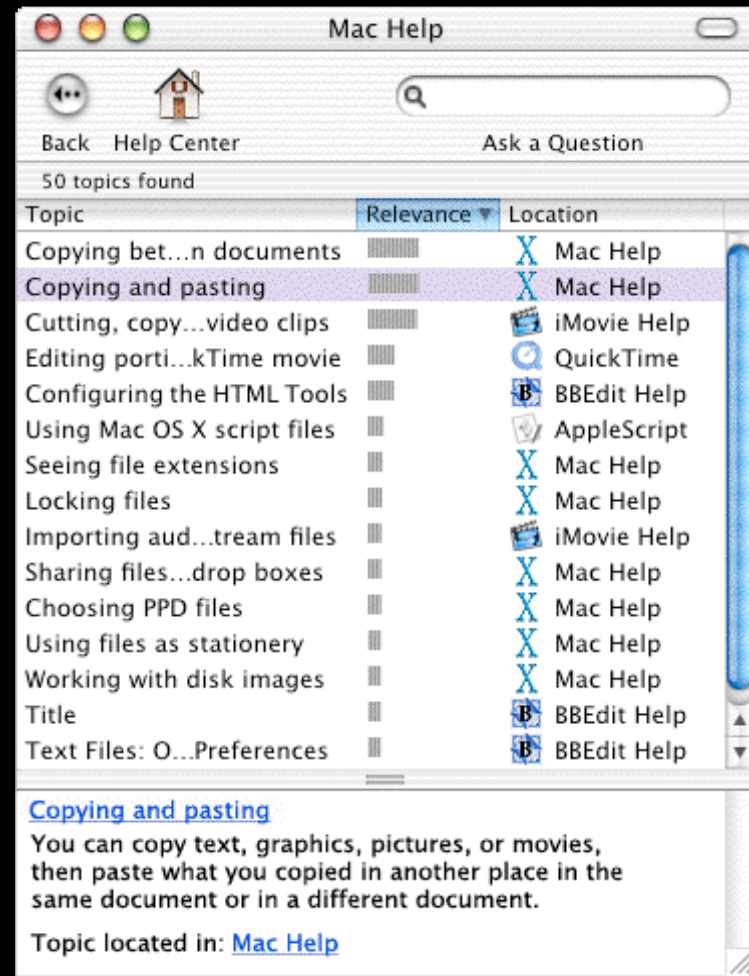

- Automatically retrieves updated search index
- New “Internet-primary” help
- Use both features for flexible help delivery

NEW

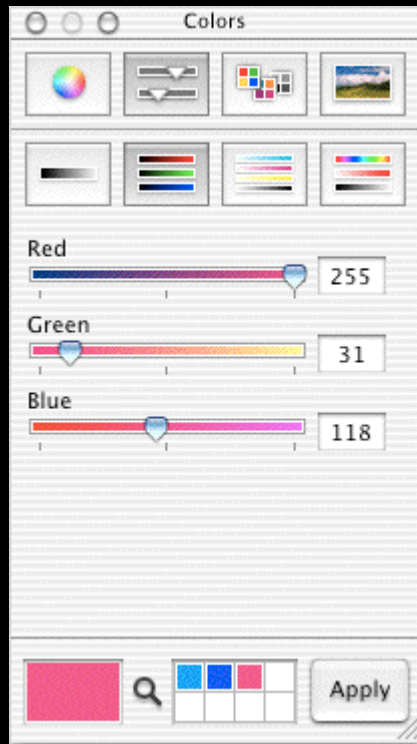

New in Help Viewer

- Multiple views
- Copy from help pages
- Enlarge font display
- Find on page
- Search results and summaries in list view
- Has a toolbar!

NEW

System Colors Window

- Delivers a consistent user experience

- Now in Carbon

New window type

`<ColorPicker.h>`

`GetColor...`

- Cocoa

`NSColorPanel`

File Name Extensions

- Provide interoperability
- “What you see is what you type”
 - Extensions are not always visible
- Save panels have built-in support
- Guidelines available from Apple Developer web site

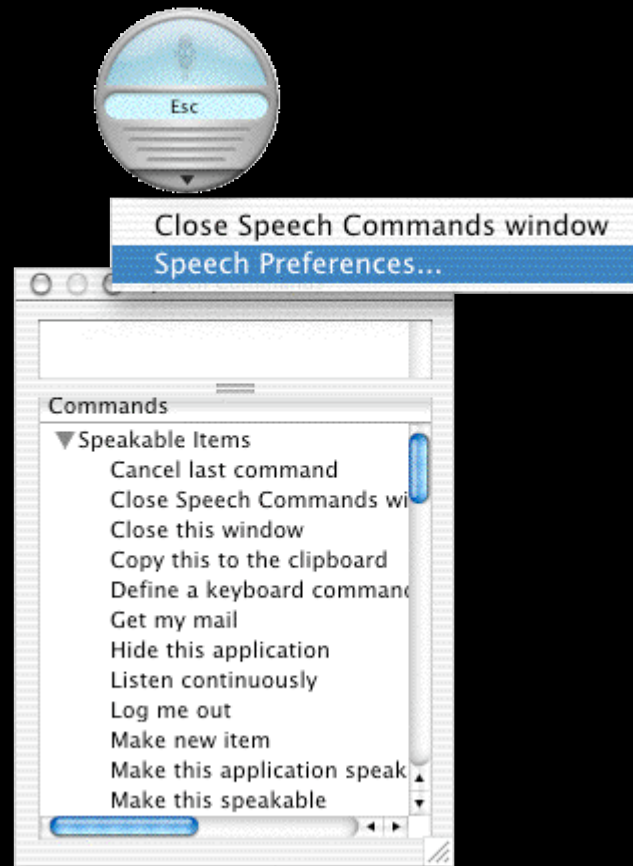

Display Names

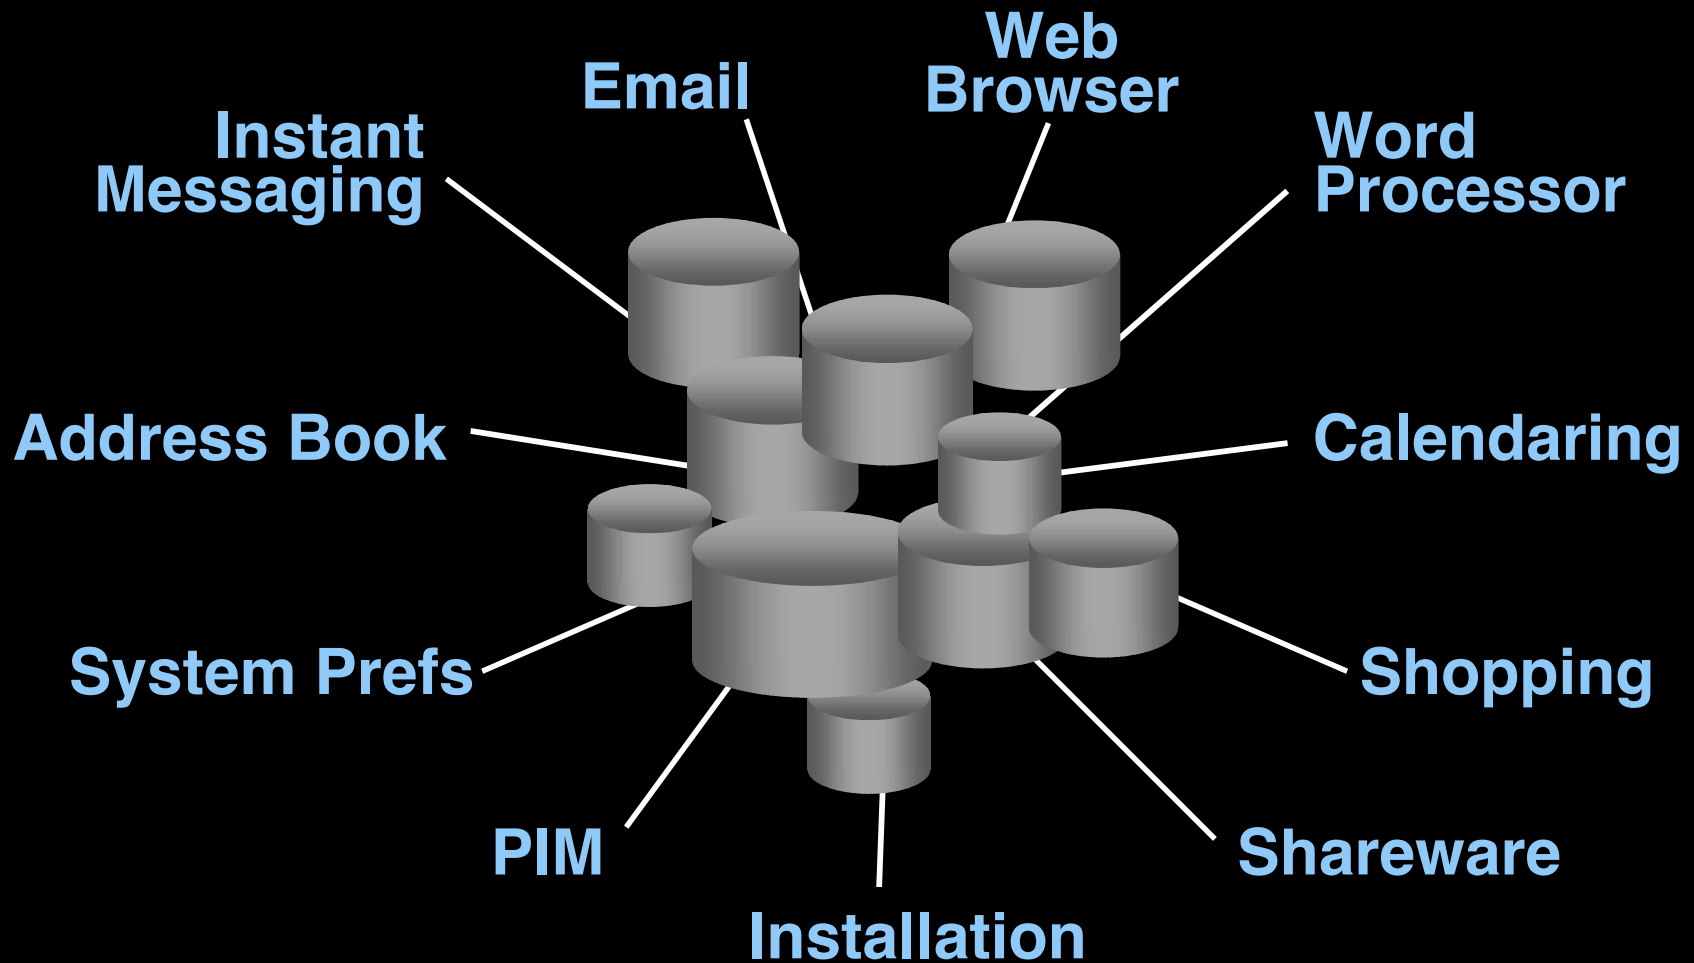

- It's what the Finder shows for each file name
- Reflects each file name as the user typed it
- New in Jaguar: folder name localization
- Use display names for:
 - Document window titles
 - Custom file lists
- Do that by calling:
 - LSCopyDisplayNameForRef**
 - LSCopyDisplayNameForURL**
- Don't assume the file system name is what the user sees

Speech Enabled

Managing Contacts

Shared Contacts

Your Responsibilities

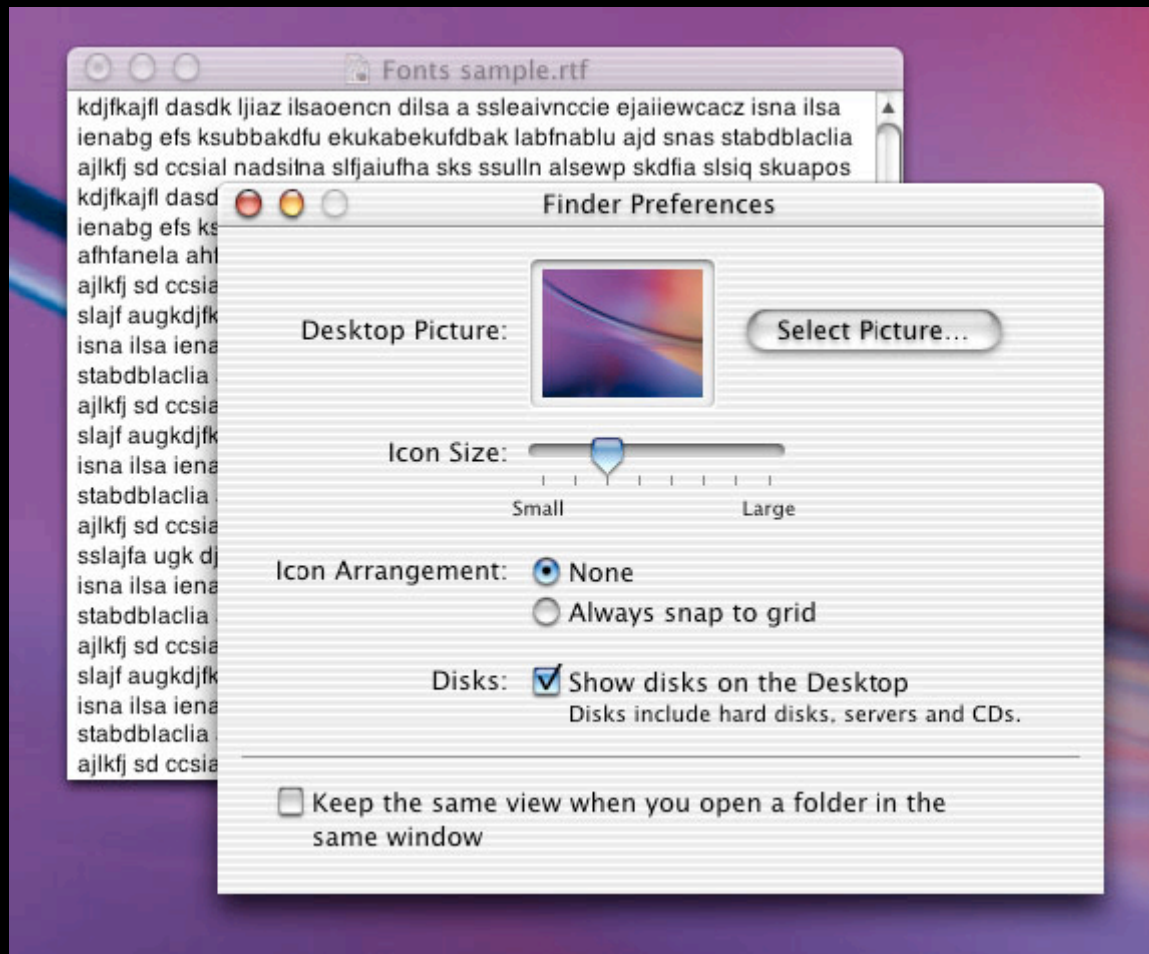

- The basics
- Behaviors
- Appearance

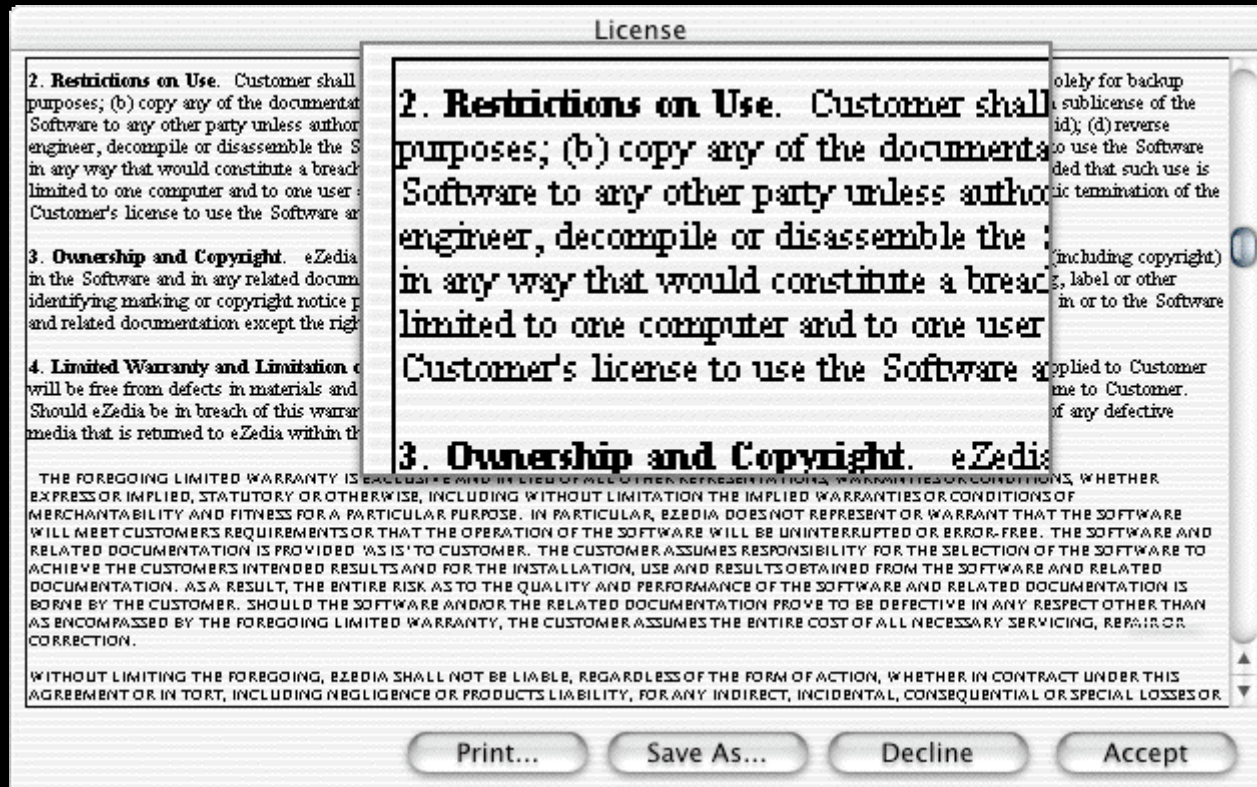

Quality Icons and Graphics

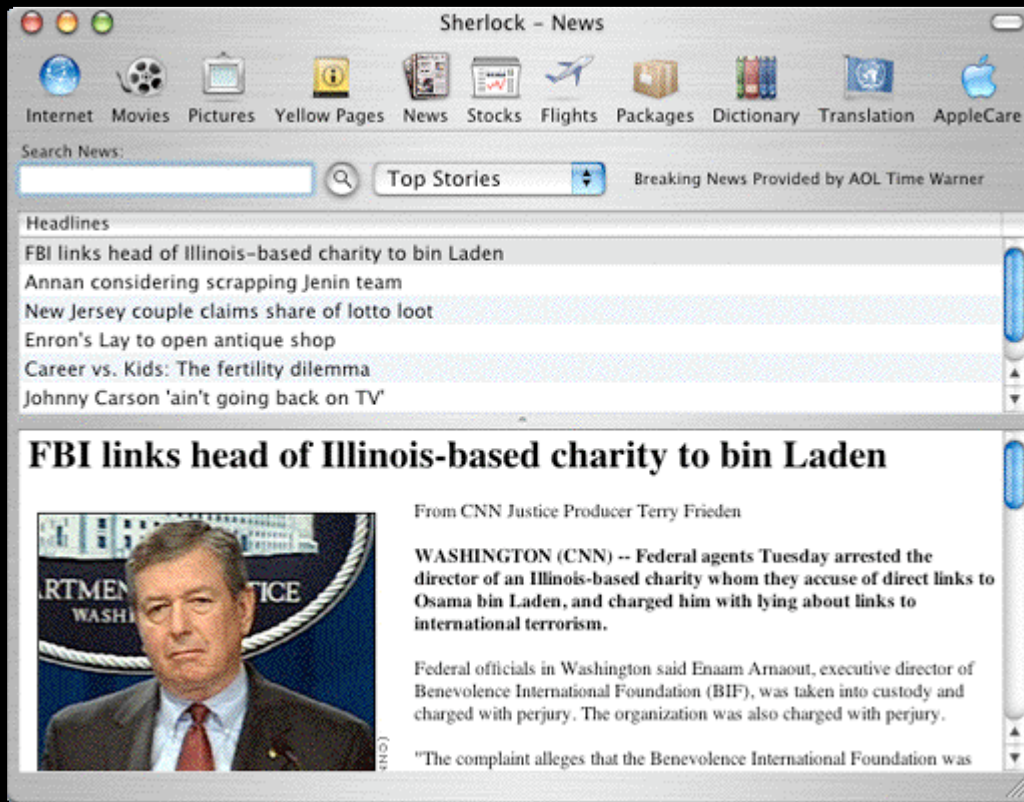

Anti-Aliased Text

Not This

Metal for the Rest of Us

- For single-window applications
- For “real-world” devices
- For main window only

Metal for the Rest of Us

Citizenship

Noun

1. The status of a citizen with benefits and responsibilities
2. Conduct as a citizen; “award for good citizenship”

Office v.X + Aqua

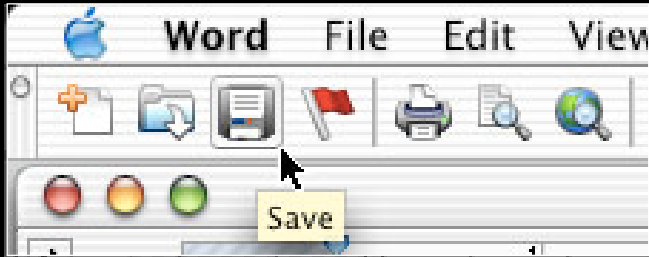

Stuart DeSpain
Lead Program Manager, User Interaction Team
Microsoft Corporation, Macintosh Business Unit

Determining Aqua

- Is Carbonizing enough?
- Old codebase, new tricks
- Our goal—set the bar
- Identify the critical areas
 - Toolbars
 - Formatting Palette
 - Dialogs
 - Core Graphics
- Examples . . .

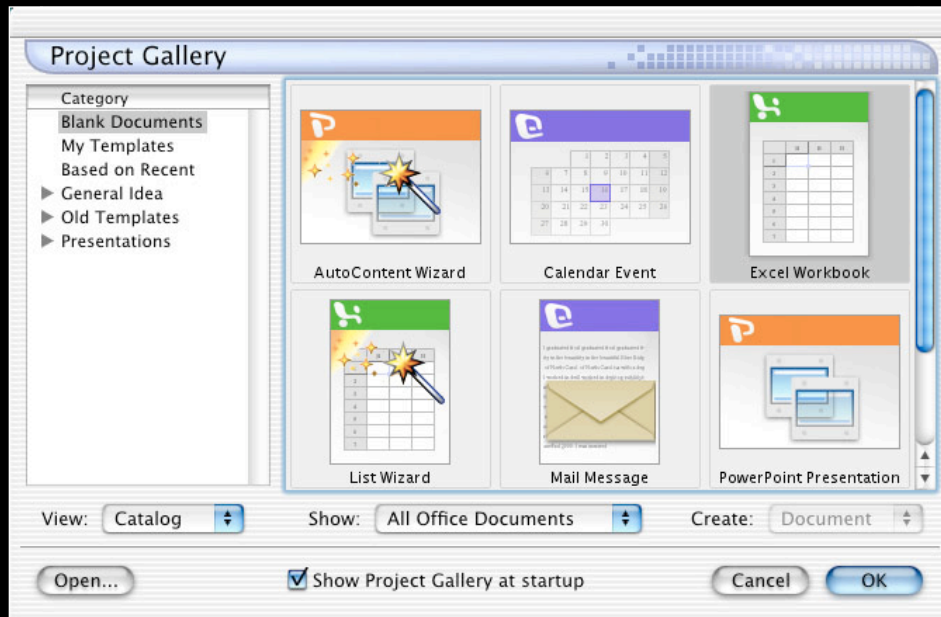

High Traffic, Hidden Feature

Toolbars

View Switcher

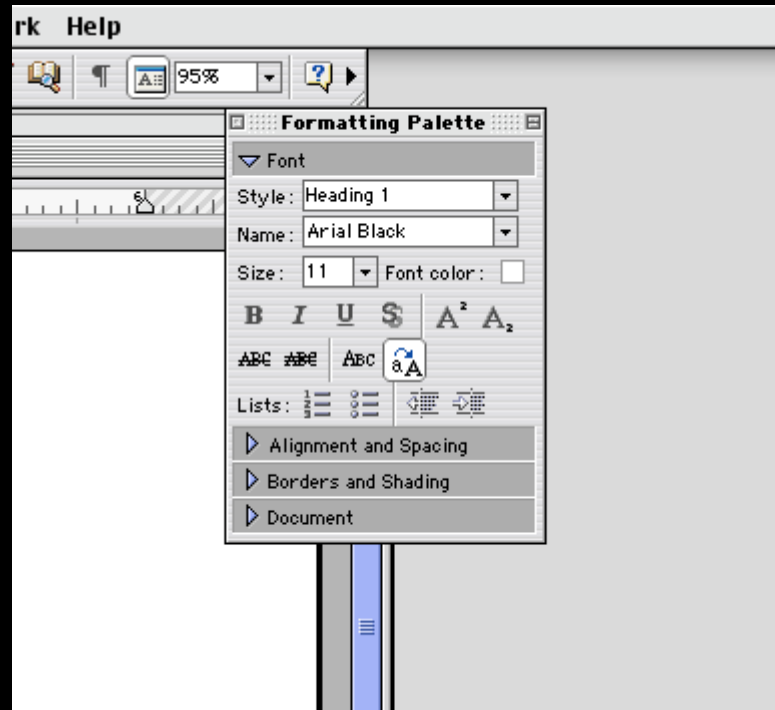

Project Gallery

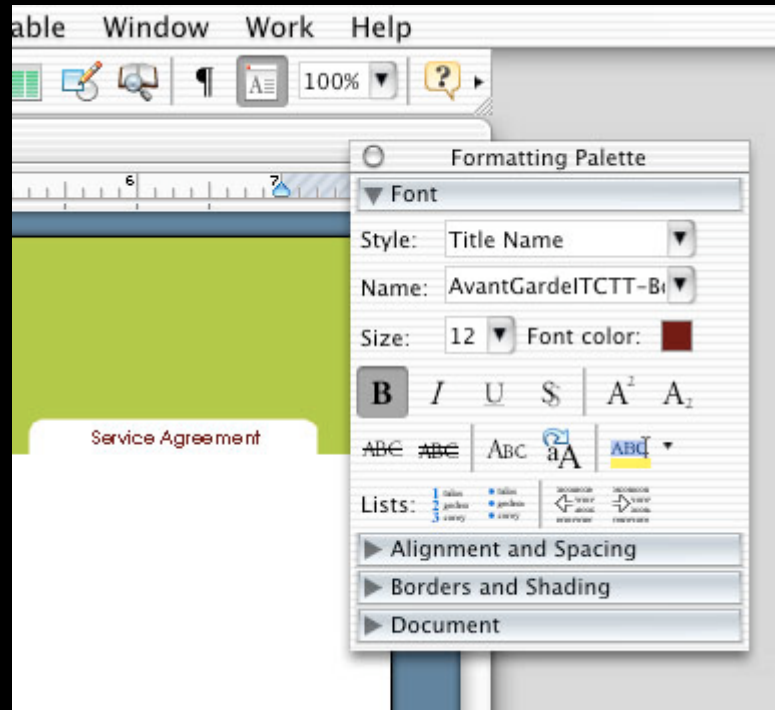

App Icons

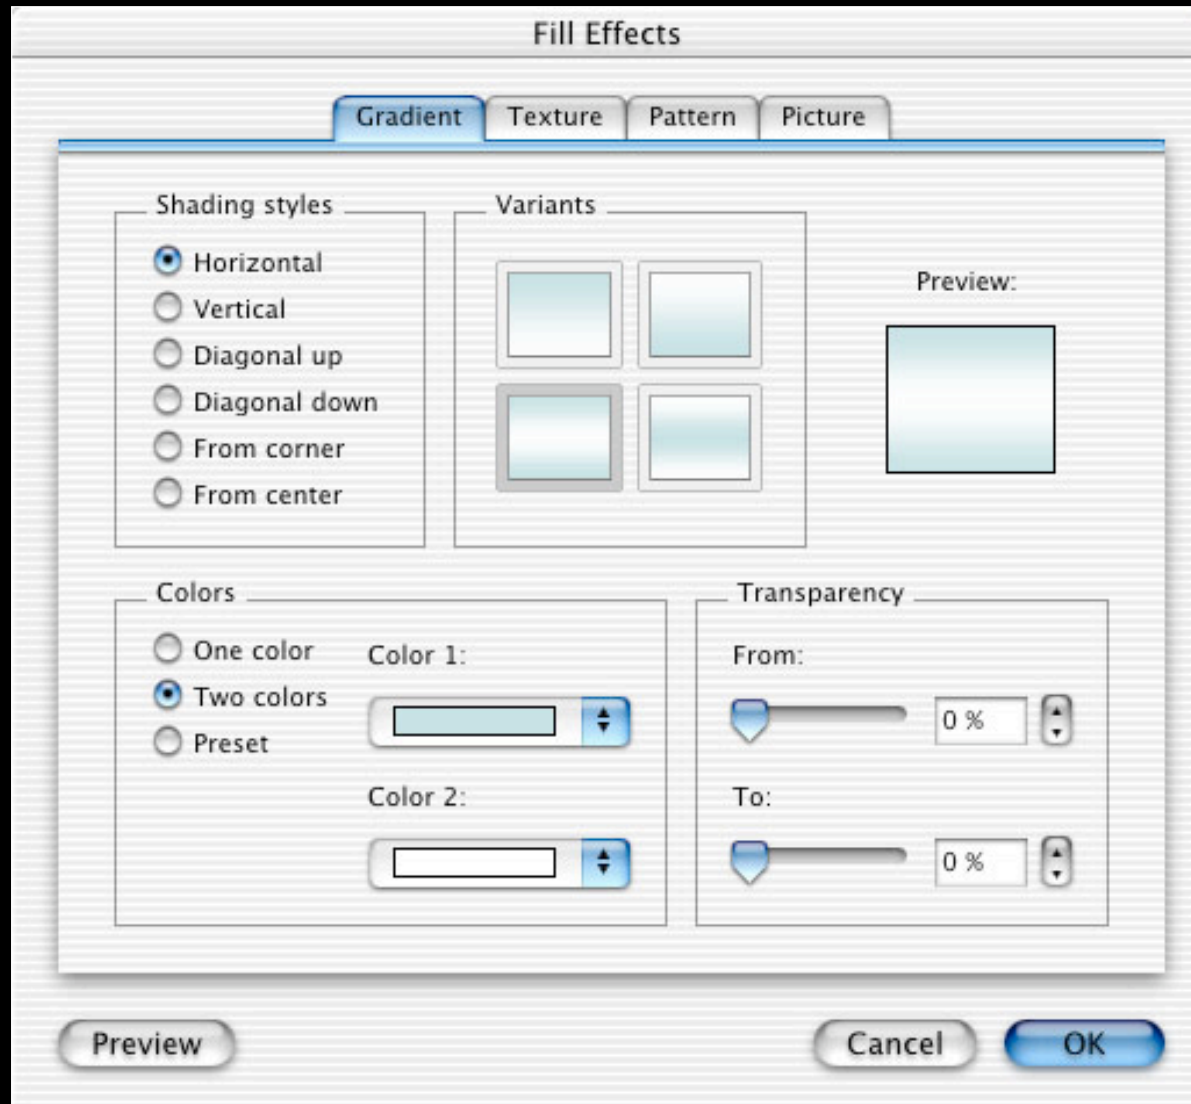

Formatting Palette

Core Graphics

Success?

“It happens to be the best-looking piece of software I have ever seen. More impressive than that, Office v. X is more than just a pretty face; Microsoft engineers put that beauty to work, and created a productivity tool that is easier to navigate because it’s so good-looking.”

Jon Fortt, San Jose Mercury News

Success?

“...Instead, this is an appreciation of a great-looking application, something so pretty it almost doesn’t look like real software— it’s more like concept software, a product that designers dream of but never quite achieve, given the exigencies of coders and the particular limitations of an operating system.”

Farhad Manjoo, Wired News

Success?

“The one we were waiting for was Office for OS X. Microsoft is thrilled with the sales rate, and **we are thrilled with the application.**”

“Microsoft did a great job on this [Office v. X], and I would like to give them a round of applause.”

Steve Jobs, Macworld SF January 2001

Aqua Payoff

- Over 800 dialogs and 500 icons later . . .
- Reviews have been very motivational
- Buzz translates into sales
- Sparking new ideas for future versions

John Geleynse
User Experience Evangelist

Ivor Clarke
President
Simple Factors

A Little Background . . .

- MeetingMaker is on version 7
- Two-part release strategy for Mac OS X
- Simple Factors brought in early in the planning for version 8

Why Bother?

- Customer feedback
- Get noticed
- Opportunity for bigger changes
- Other platforms

Areas of Focus

- Look and feel
- Improve feedback to the user!
- Information presentation

Double-click on a circle to change the color for that item.

The screenshot shows a calendar interface with two columns: Tuesday, December 20, and Wednesday, December 21. The calendar is color-coded: Tuesday is light purple, Wednesday is blue, and the current day (Wednesday) is highlighted in a darker blue. Various events are shown, including 'Taking a day off' (purple banner), 'Team Offsite' (white banner), 'MacWorld Keynote @ Moscone Center, Room B' (9am-10am), and 'One-on-one (Your Office) From Jim Reekes' (10am-11am). The time slots are labeled from 8am to 12pm. On the left, there are callouts for 'Day/hour fill', 'OOF banner', 'OOF tinge', 'Accepted event', and 'Day/hour font' (set to Verdana). On the right, there are callouts for 'Current day highlight', 'All-Day Event', 'Non-work hours', 'Penciled-in Event', and 'Free time'. At the bottom right, there are 'Cancel' and 'OK' buttons.

Item	Color
Day/hour fill	Light Purple
OOF banner	Purple
OOF tinge	Light Purple
Accepted event	White
Day/hour font	Verdana
Current day highlight	Dark Blue
All-Day Event	White
Non-work hours	Blue
Penciled-in Event	Grey
Free time	White
